# ELIJAH VICTOR

**Frontend Engineer**

Abuja, Nigeria | elijahvix695@gmail.com | Portfolio | LinkedIn | GitHub

## PROFESSIONAL SUMMARY

Frontend Engineer with 2+ years of experience building responsive web applications with React, Next.js, TypeScript, and JavaScript. Delivered role-based finance workflows, marketplace interfaces, dashboards, and landing pages across fintech, education, and SaaS products. Skilled in reusable components, REST API integration, design implementation, performance, and collaboration with backend and product teams.

## EXPERIENCE

**Frontend Engineer (Contract) | School Finance Platform** **Apr 2026 – Aug 2026**

- Built administrator and student portals for school onboarding, payable categories, semester fee assignments, financial obligations, generated account numbers, and payments.
- Implemented role-based interfaces and integrated authentication, school-management, and payment APIs across core workflows.
- Worked with backend and product teams to deliver the platform's essential finance workflows.

**Frontend Developer (Part-time) | SafeGeeg** **Jan 2025 – Jan 2026**

- Built reusable React, Next.js, and TypeScript interfaces for the web version of a freelance marketplace.
- Improved UI design, website load time, and cross-browser compatibility across the application.
- Collaborated with engineers to maintain scalable frontend code and responsive product views.

**Frontend Developer | Rahapay** **Jul 2024 – Dec 2024**

- Helped build a responsive bill-payment web application for users in Northern Nigeria with JavaScript, React, and Next.js.
- Maintained scalable frontend code and reduced technical debt in collaboration with the development team.

**Frontend Developer Intern | Sandlip Digital Consulting** **Feb 2024 – May 2024**

- Built responsive websites and landing pages with React and Next.js.
- Created reusable components and applied modern frontend development practices.

## SELECTED PROJECTS

**Sitelytics** Built landing pages and web-app screens for an AI website auditing product; web-app screens are not yet live. Also contributed mobile authentication and profile screens.

**ReconXi** Built dynamic tables, reconciliation upload flows, and result views for a financial reconciliation platform.

**Chatme** Built the dashboard view for a platform that helps organizations manage knowledge-based chatbots.

**Treasury Plot** Built a responsive financial media interface for daily market briefings and research insights.

**Savvyrena Technologies** Built the company landing page.

## SKILLS

**Frontend:** React, Next.js, TypeScript, JavaScript, HTML, CSS, Tailwind CSS, responsive design **Data and tools:** REST APIs, Redux Toolkit, TanStack Query, Zustand, Git, GitHub, Figma-to-code, Jest, Vitest

## EDUCATION
